## Introduction to Python

Python is a high-level programming language.

Python is used for backend development.

Python is also used in Machine Learning.

Python is widely used in Artificial Intelligence.

## Introduction to LangChain

LangChain is a framework for building LLM applications.

It provides document loaders and text splitters.

It helps developers build RAG applications.

## Introduction to RAG

RAG stands for Retrieval Augmented Generation.

RAG retrieves relevant information from documents.

The retrieved information is passed to an LLM.
